Published Feb. 8, 2024

Prepare for an awe-inspiring showcase where innovative minds, cutting-edge technologies, and steadfast dedication converge. Our healthcare entrepreneurs aren't just creating companies; they're shaping legacies. These legacies will echo through time, making a lasting impact on human health and well-being.

Dr. Maged el-Malecki, Founder of Boston Dental

Boston Dental focuses on cutting-edge technology, innovative solutions, and a customer-first approach, revolutionizing the traditional care of dentistry. Led by Dr. Maged el-Malecki, Boston Dental has three strategically located offices in Boston, including the recent addition in the Seaport neighborhood just over a year ago. Boston Dental embraces a patient-centric approach to put the most nervous and anxious client at ease.

FlossTime was born from this same passion and dedication to revolutionizing dentistry. A sister partner of Boston Dental, FlossTime brings the same quality, care, and expert service right to the doorstep of corporate offices. "We thought of this concept once we realized that appointments were being missed due to hectic work schedules," Dr. el-Malecki said. "It's important to keep up with shifting times and this is one way we found to adjust seamlessly."

Both Boston Dental and FlossTime currently service central Boston and looking forward to expansion.

Dr. Wendy Oliver-Pyatt, Cofounder, CEO, and Chief Medical Officer of Within Health

Dr. Wendy Oliver-Pyatt is the Co-Founder, CEO, and Chief Medical Officer of Within Health, an innovative remote eating disorder treatment provider. Before Within, she established the Center for Hope of the Sierras, a specialized treatment facility, and the Oliver-Pyatt Centers, which focused on providing comprehensive, individualized care. Further extending her impact, she launched Clementine Adolescent Treatment Programs dedicated to aiding younger patients.

Dr. Oliver-Pyatt's dedication to mental health extends beyond clinical settings. She founded the Be the Light Charitable Foundation, a testament to her commitment to broader societal change. Additionally, she pioneered Weigh Stigma Awareness Week, an initiative to challenge societal prejudices and promote a healthier, more inclusive understanding of body image and self-worth. Her work continues to inspire and set new standards in treating and perceiving eating disorders.

Dr. Ergi Gumusaneli M.D.

Dr. Ergi Gumusaneli M.D. is at the forefront of revolutionizing mental health care in the United States. As the Founder and CEO of Fitz Ilias, a mental health service company, his commitment to excellence and patient care sets him apart as a recognized expert in the field. Under his visionary leadership, Fitz Ilias has grown into an organization that empowers medical clinics, residential facilities, treatment centers, and hospitals nationwide to achieve exceptional mental health care for their patients. Fitz Ilias' unique decentralized and integrated model prioritizes whole-person care and uses data-driven analytics along with superb customer service, making it the top choice for collaborative partnerships and mental health integration. Driven by the belief that "EVERYBODY deserves exceptional mental health," Fitz Ilias is reshaping how mental health care is delivered, transforming lives and entire communities across America.

Dr. Mark Stein, NY Oral & Maxillofacial Surgery Dental Implant Center

Dr. Mark Stein, a distinguished oral and maxillofacial surgeon in New York City, is renowned for his unique dual qualifications in both dental and medical fields. He is one of the few in New York to hold both dental and medical degrees, enabling him to offer comprehensive care for various oral and maxillofacial conditions. Dr. Stein's practice, NY Oral & Maxillofacial Surgery, is noted for minimally invasive techniques in reconstructing maxillofacial bone defects, attracting patients globally to his advanced 5th Avenue center. With over 25 years of experience, he specializes in dental implant surgery, complex bone grafting, wisdom teeth removal, and sinus lift surgery. His proficiency is underscored by the tens of thousands of dental implants he has placed. Dr. Stein's expertise has been recognized on the Discovery Channel's *Super Surgeons* and through multiple NY Times *Super Doctors*® awards. His practice's excellence in oral and maxillofacial surgery is a testament to his extensive experience, specialized services, and professional recognition in New York City.

Gabriele Keil, CFO of Cell4Care

Gabriele Keil, CFO of Cell4Care: "The Cell4Care therapy concept was developed in cooperation with German conventional physicians." The difference? "They do not treat the symptoms of a disease but the cause. The team of doctors, consisting of experts from various medical fields, enables a wide range of biological medicine therapies. Patients can submit their diagnoses and medical reports to our Centro Medico by email and then receive a medical video consultation with the offer of customized inpatient or day-care therapy in Palma de Mallorca (Spain). We are also the exclusive INUSpheresis center in Mallorca. Clinical trial results indicate that the purification of the blood after a coronavirus infection supports the recovery from long and post-Covid. Cell4Care also organizes flights, accommodation, and meals.

The stories shared here are not just tales of success; they are blueprints for a healthcare landscape that embraces progress, inclusivity, and the relentless pursuit of excellence. The impact of these entrepreneurs extends far, reaching into the lives of individuals and communities, shaping a healthier and more promising tomorrow.
